

## Florajen® Acidophilus

High Potency Acidophilus  
20 billion live cultures per capsule  
30 or 60 capsules per bottle

### Ingredients:

*Lactobacillus acidophilus* NCFM

Especially effective for restoring and maintaining a healthy, comfortable balance of vaginal flora

Extra  
High Potency  
Especially effective  
for restoring a  
healthy balance of  
vaginal flora

## Florajen3®

Unique Multiculture Formula  
15 billion live cultures per capsule  
30 or 60 capsules per bottle

### Ingredients:

*Lactobacillus acidophilus* NCFM  
(7.5 billion cells)

*Bifidobacterium lactis* Bi-07  
(6 billion cells)

*Bifidobacterium longum* Bl-05  
(1.5 billion cells)

Highly effective for restoring and maintaining gastrointestinal health

Unique  
Multiculture  
Formula  
Especially effective  
for gastrointestinal  
health

## Florajen4Kids®

Multiculture Formula  
for Children of All Ages  
6 billion live cultures per capsule  
30 capsules per bottle

### Ingredients:

*Bifidobacterium lactis* Bi-07  
(3.5 billion cells)

*Bifidobacterium lactis* HN019  
(1 billion cells)

*Lactobacillus acidophilus* NCFM  
(1 billion cells)

*Lactobacillus rhamnosus* HN001  
(0.5 billion cells)

Helps maintain a natural balance of flora, important for intestinal health and a developing immune system, in children of all ages

For children under 6 months old, it's always best to consult a healthcare professional before use.

Safe and  
Effective for  
Children of  
All Ages

For young children, open capsule and sprinkle on food, in beverage, or mix with powdered formula.

All Florajen probiotics are gluten-free, dairy-free, non-GMO, and are manufactured in GMP U.S. certified facilities.

### What are probiotics?

Probiotics are food-based, yogurt cultures—the same beneficial microorganisms that occur naturally in healthy people.

### How do probiotics work?

Probiotics help replenish the normal “friendly” microbes in the intestinal and vaginal tracts that are destroyed by antibiotics and other influences. These good flora assist in nutrient absorption and support the immune system by forming a defensive shield against harmful pathogens, allergens and other dangerous particles in our environment.

### Should probiotics be taken while on antibiotics?

Yes, it is recommended to take while on antibiotics, about 1-2 hours away from the antibiotic. Continue taking the probiotic for at least 2 weeks after the antibiotic.

### How do probiotics help maintain gastrointestinal health?

Pathogens produce toxins that can result in digestive discomfort. Probiotics interfere with the growth of pathogens, reducing the toxins.

### How do probiotics promote a healthy balance of vaginal flora?

Probiotics produce trace amounts of lactic acid, causing the pH in the vaginal tract to drop. (A lower pH is considered normal for a healthy vaginal tract.) High cell counts of probiotic cultures crowd out and inhibit growth of yeast and harmful bacteria, helping to restore the delicate balance required for comfort and health in a woman's body.

### What is the importance of higher cell counts?

The intestinal tract contains over 500 different species of bacteria. High cell counts are needed to impact the balance and re-establish the beneficial flora within this huge population of microbes. Users should be assured there are no negative side effects or drug interactions from taking too much Florajen.

### What is the difference between Florajen and Florajen3?

Florajen contains one active ingredient, *Lactobacillus acidophilus*, and has a total cell count of over 20 billion live cultures. It is especially helpful for maintaining a natural balance of vaginal flora. Florajen3 includes *Lactobacillus acidophilus*, *Bifidobacterium lactis* and *Bifidobacterium longum* with a total cell count over 15 billion live cultures. It is especially helpful for maintaining gastrointestinal health.

### Is refrigeration absolutely necessary for Florajen and does it stay effective out of refrigeration?

Refrigeration is required to maintain living cells and sustain freshness and potency. However, because each capsule is generously loaded with over 20 billion cultures, Florajen remains effective for weeks without refrigeration and can be used confidently while traveling.

### How does Florajen survive stomach acid and maintain potency through the intestinal tract?

Florajen's pharmaceutical-grade gelatin capsules stay intact for 35-40 minutes after swallowing. When taken on an empty stomach, capsules will enter the pH-neutral small intestine in 30-40 minutes. It is very important for the capsule to open up at the beginning of the small intestine so the culture is released and begins to work. Many enteric-coated capsules open up far too late in the intestinal tract, reducing their effectiveness.

### What happens to Florajen after the expiration date?

Under refrigeration, Florajen is safe and effective for up to two years after the expiration date.

High Potency Probiotic Dietary Supplements

# Florajen®

Replenishes  
good flora  
when you're  
on antibiotics

Helps maintain the natural  
microbial balance the body  
needs to stay healthy

Culture You Can Count On™

## Florajen restores good flora when you're on antibiotics

Antibiotics are usually taken to kill harmful bacteria causing a disease. Unfortunately, antibiotics simultaneously kill the good bacteria the body needs to stay healthy.

Unpleasant side effects can cause patients to stop taking prescribed antibiotics, and harmful bacteria might not be completely eliminated.

Florajen probiotics help encourage patients to complete the full course of their antibiotic prescriptions by restoring the body's comfortable natural microbial balance.

---

*High-potency Florajen probiotics are recommended for anyone taking antibiotics, to replenish good flora and restore a healthy natural microbial balance.*

---

## How Florajen probiotics work

Florajen probiotic dietary supplements contain high concentrations of the same beneficial micro-organisms that occur naturally in healthy people. They help maintain a healthy, natural balance of flora in the intestinal and vaginal tracts.

### The Florajen Promise to You

**Safe** All strains used in Florajen have been clinically proven safe and are 100% U.S. manufactured in GMP certified facilities.

**Effective** Each refrigerated capsule contains over 20 billion live cultures to help restore balance to your intestinal or vaginal tract.

**Affordable** For less than the cost of a cup of yogurt, each Florajen capsule contains more than 10 times as much live probiotic culture.

## Florajen maintains the natural balance needed to stay healthy

Modern lifestyles and dietary changes have depleted many of the beneficial micro-organisms critically important to the body's natural balance. While medications are the primary culprit, other causes include stress, sugar, alcohol, pollution and fast food.

Florajen high potency probiotics help maintain the natural barrier microflora form on the intestinal wall. This barrier restrains the growth of harmful bacteria that can cause digestive stress, resulting in improved digestion and better absorption of key nutrients, vitamins and minerals.

## Culture you can count on for maximum effectiveness

Research has shown that to be effective, probiotic supplements must contain billions of live cells. While many off-the-shelf probiotics fall far short of this standard, each Florajen capsule contains over 20 billion live cells. Continuous refrigeration maintains Florajen's high potency from the time it is manufactured to the time it is purchased.

## 1 capsule Florajen = 10+ cups yogurt

Florajen contains the same strain of *Lactobacillus acidophilus* used by most yogurt companies in the United States since 1973, yet it is dairy-free.

For more information, visit [www.florajen.com](http://www.florajen.com).

## A Company and Product you can count on for superior value

American Lifeline was founded in 1991 by one of the world's leading food bacteriologists, Dr. Robert Deibel, Chairman of the University of Wisconsin's Department of Bacteriology, and his colleague and respected food bacteriologist, David Sullivan, President of American Lifeline.

Since its inception, American Lifeline has pursued a scientific and highly ethical approach to its business. That is why Florajen is manufactured with enough live cells to work effectively—over 20 billion per capsule—and it is priced so everyone can afford its benefits.

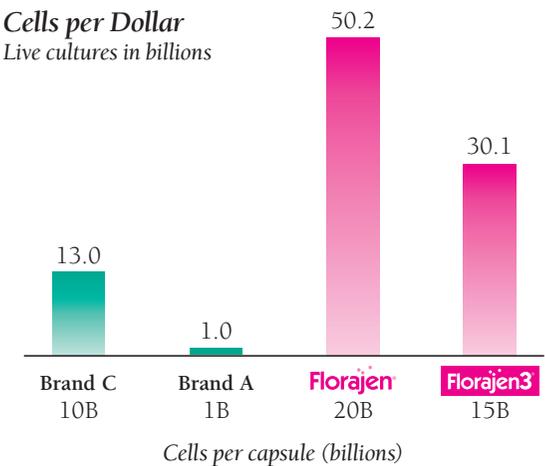

---

*Florajen delivers significantly more cells per dollar spent, making it a far better value.*
